I had to do some research to answer your question. Actually, I want 8 Figures. In the book, what I would call charts, they are called Figures and are located in a section labeled "Figures." They are: 2-3a, b, c, d, e, f, and 2-4, 2-5.

Do you know how many pages the book is? The pages are not numbered sequentially but by chapters. It looks like a big thick book. How would I download the pages of Chapter 1.3?

Thanks for your help.

Which 5-6 charts are you interested in?

Thank you for your reply. I know how busy you guys are. I was really only interested in the color charts which showed the location and distribution of the toxins. As I told Dave K., I can't print in color. There are only 5 or 6 charts if I'm not mistaken. Will the new model be available on paper?

Sorry - I lost track of your request that David had forwarded some time ago. The 2007 Conceptual Site Model is being updated right now with new information, and being streamlined (you may have noticed it's a bit long and unwieldy to read). It would be better to wait until the revised Conceptual Site Model comes out.

However, if you can't wait -- The whole 2007 document is too long to print out. I would advise that you read the Conceptual Site Model Summary in Chapter 1 (Section 1.3), which only has 10 figures.

Let me know if you need more help.

Subject: Passaic Conceptual Site Model Copies

May be I should have contacted you first but I sent an e-mail to Doug Sarno concerning the 2007 Conceptual Site Model on Our Passaic.org. The problem I encountered is that there are tables in the posting which are in color and I do not have a color printer. I could download the text part with no problem but the text refers to the tables which, as I said are color coded, and I can't download in color. What I asked Doug and I am now asking you is if I could get copies of the tables only or a copy of the complete study? It appears that I would have to download the entire study which to me would be a waste of time, money and paper if I can't use the tables. I was also wondering if that was the latest study available since it is 5 years old or is there a newer study which has not been posted as yet? Doug said that he would check with the EPA which means that he may have contacted you all ready about my request but I have not heard back from Doug, and I know he is busy, which led me to contact you. Do you have any suggestions?
